

# INCIDENT RESPONSE DEMAND ZONES

## Comparison of existing standards and NFPA 1720 demand zones

### NOTES

- Call Distribution for all incidents and emergent response times for the urban and rural area are based on responses from July 1, 2011 to June 30, 2012.
- Emergent response times for the suburban area are based on responses from January 1, 2012 to June 30, 2012 to reflect the adjustment of staffing at the Gold Hill station.
- Current response time targets plan for the arrival of the first responding engine on scene 80% of the time in the urban area within 6 minutes; the suburban area within 10 minutes; and the rural area within 12 minutes.
